PULVERIZERS

STATIC PULVERIZERS

- Engineered with both primary and secondary work in mind
- Ideal for initial demolition and secondary sorting
- Hardened material for ultimate productivity
- Easily interchangeable teeth and tips
- Various sizes available

To suit excavators from
8 ton - 45 ton

Flexible terms
24/7 support
low fixed monthly costs

ROTATING PULVERIZERS

- Engineered with both primary and secondary work in mind
- Ideal for initial demolition and secondary sorting
- Hardened material for ultimate productivity
- Various sizes available
- Easily interchangeable teeth and tips
- 360 degree hydraulic powered rotation

To suit excavators from 13 ton - 45 ton

MULTI PROCESSORS

- Ideal for primary breaking of reinforced and oversized concrete structures and pillars
- Suitable for secondary breaking, rebars cutting and separation from processed concrete for easy recycling of materials
- Perfect for cutting of metal structures such as industrial buildings, pylons, train cars, scrap metal processing, pipes, beams and heavy duty tyres

WIDE RANGE AVAILABLE

Operating Weights from 380 kg - 3,500 kg
To suit excavators from 2 ton - 50 ton

Flexible terms | 24/7 support | low fixed monthly costs

MINI CRUSHERS

- Knock-round / hydraulic rotation system with a durable bearing
- Hardened jaw manufactured using Hardox
- Wide jaw opening for large demolition surface
- Fully reversible blades
- Protected hose routing inside the frame
- High power cylinder
- Light weight but rigid body frame

Operating Weights
from 143 kg - 480 kg

To suit excavators
from 1.5 ton - 8 ton

CRUSHER BUCKETS

- Crush and recycle construction and demolition material
- Separate steel bars from concrete effectively
- Maximise productivity and profits
- Re-use material, reduce transport costs
- Adjustable output sizes

To suit excavators from sizes 14 ton to 30 ton

Flexible terms | 24/7 support | low fixed monthly costs

SCREENING BUCKETS

- Ideal on construction, demolition and landscaping applications
- Perfect for salvaging aggregates, selecting waste material on demolition sites, and separating natural waste at landfill sites
- Interchangeable screening nets from 20 mm to 150 mm
- Easy to replace bolt-on wear edges
- Reduce down time and maximise productivity

Working Weights
from 110 kg - 4900 kg

To suit excavators
from 1.5 ton - 65 ton
